

Intecnica was formed in 2003 to provide computer-based training (CBT), web based training (WBT) and e-Learning solutions to companies in the airline and aerospace industry.

Intecnica's founders Len Perkins and Susan Taylor have over 20 years experience of working with aviation training organisations developing and supplying CBT and other technology based solutions. Our team of experienced developers and partner companies is carefully selected from professionals with a broad base of experience ranging from early DOS authoring systems to the latest Windows® technologies such as Flash™, XML or web-based authoring systems.

Intecnica provides the following services:

- e-Learning consultancy
- Design and development of customised e-Learning programs including CBT and WBT
- Support for legacy CBT programs
- Updating and conversion of existing text and CBT courseware
- Supply of contract development staff
- Sourcing, supply and installation of off-the-shelf CBT and e-Learning programs

Whatever your requirements contact us for a no obligation discussion about how we can help.

E-Learning Consultancy

Intecnica can provide you with a range of specialist services to assist in training and developing your staff. We offer a menu of activities to support traditional computer based and e-Learning content development including:

- Assessment of your e-Learning readiness and needs
- Training needs analysis
- Return on investment analysis
- Instructional design support
- Project management support
- Support in procuring CBT/WBT and e-Learning programs

Design and Development of Customised E-Learning Programs

Intecnica offers a complete bespoke e-Learning design and development service including:

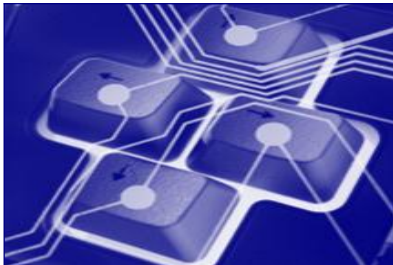

- Design of detailed instructional events and courseware storyboards
- Development of graphics, animations, video and other media assets
- Design of delivery architecture
- Integration and testing of e-Learning materials
- Installation of and training on completed e-Learning materials
- Evaluation of training results
- Maintenance and on going support for implemented programs

Support for Legacy Courseware

Intecnica has access to a wide network of skilled development personnel, and is able to offer comprehensive technical support for programs that are no longer supported by the original manufacturer.

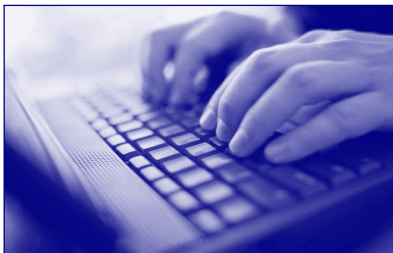

Support may include courseware revisions and corrections as well as delivering training on various legacy authoring systems.

We can provide you with the complete solution or provide skilled personnel under contract at your own premises.

Conversion of Existing Text and Computer Based Courseware

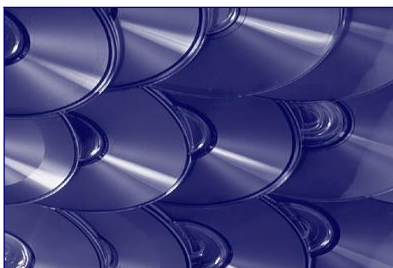

Intecnica can provide a cost effective conversion service to take advantage of the latest technology and delivery mechanisms. This service will be particularly attractive for clients who already have effective training programs, but which may now be considered 'out-of-date' and need updating.

Intecnica can convert printed, slide based or interactive computer-based training courseware.

Supply of Contract Staff

Intecnica has access to a wide range of skilled instructional designers, graphic artists and programmers, and is able to provide development resources under contract to you to support your own in-house teams.

Our network of resources are all experienced professionals with several years practical industry experience.

Supply of off-the-shelf CBT and e-Learning Courseware

Intecnica has agreements with leading courseware providers and can find you the program which you need, if it exists on the market. We can then provide you with the program for you to install and configure or we can provide a complete end-to-end solution, including supply, installation and integration on your premises, training and on-going maintenance.

We can also help you to market your own programs, if you have developed training software which may be of use to other aviation organisations.
